

Invenergy and SB Energy Announce Launch of Commercial Operation of Queens Solar Farm

CHICAGO and TOKYO (October 2, 2020) – Invenergy Japan G.K. (“Invenergy”), a Japanese wholly-owned subsidiary of Invenergy Investment Holdings LLC and SB Energy Corp. (“SB Energy”), a Japanese wholly-owned subsidiary of SoftBank Group Corp., announced the start of commercial operation of the 9.2-megawatt dc Queens Solar Farm.

Queens Solar Farm, operated by Queens Solar Energy G.K., is located in Fukushima Prefecture. The facility will generate a total of 9,774,600 kWh per year, enough electricity to power approximately 2,715 Japanese homes annually.

The partnership between Invenergy and SB Energy combines Invenergy’s international experience with advanced, large-scale development and SB Energy’s domestic know-how accumulated through various solar projects in Japan.

Overview of Queens Solar Farm

| | |
|---|--|
| Location | Matsukawa-machi, Fukushima City, Fukushima Prefecture |
| Site Area | 24ha |
| Output scale | 9.2MW dc |
| Estimated Annual Solar Power Generation | 9,774,600 kWh/year Equivalent power needed to supply approximately 2,715 households *One household calculated as 3,600kWh/year |
| Launch | October 2, 2020 |

About Invenergy

We are innovators building a sustainable world. Invenergy and its affiliated companies develop, own, and operate large-scale sustainable energy generation and storage facilities in the Americas, Europe and Asia. Invenergy's home office is located in Chicago, and it has regional development offices in the United States, Canada, Mexico, Colombia, Japan, Poland and Scotland. Invenergy has successfully developed more than 25,000 megawatts of projects that are in operation, construction or contracted, including wind, solar, and natural gas power generation facilities as well as advanced energy storage projects. For more information, please visit www.invenergy.com.

About SB Energy Corp.

SB Energy, a subsidiary of SoftBank Group Corp., is a leading renewable energy company in Japan. As of October 2nd 2020, it has plants with a power-generation capacity of 567 MW (equivalent to the power needed to supply approximately 180,413 households) in Japan and a 50MW wind farm in Mongolia's Gobi Desert. SB Energy is aiming to spread and expand the adoption of renewable energy derived from natural sources, such as large-scale solar (Mega Solar) power generation and wind power generation facilities.
